PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 11+ years of experience in designing and building scalable, high-performance systems using Python, Django, and the MERN stack. Proven expertise in backend architecture, API development, database optimization, and cloud-based deployments (AWS). Adept at leading projects end-to-end, collaborating with cross-functional teams, and mentoring engineers to uphold development best practices.

Track record includes scaling applications to serve 120,000+ users, delivering robust edtech products, and optimizing legacy systems for enterprise clients. Passionate about solving complex problems, driving technical excellence, and staying at the forefront of emerging technologies.

TECHNICAL SKILLS

- Languages: Python, JavaScript, C
- Backend Frameworks: Django, FastAPI, Express.js
- Frontend Technologies: React.js, HTML5, Alpine.js, htmx, TailwindCSS, Bootstrap 5
- Databases: PostgreSQL, MySQL, MongoDB, Redis
- Cloud Platforms: Digital Ocean, AWS
- APIs: REST, GraphQL
- DevOps & Deployment: Docker, Nginx, Git, Github Actions
- Database Design & Performance Tuning
- Code Reviews
- Project Planning & Management
- Mentoring & Team Assessment
- Responsive UI/UX Design

WORK EXPERIENCE

Senior Python Developer

2023 - now

Zartek Technologies, Pvt. Ltd. - Kerala, IN (full-time, hybrid)

Zartek Technologies is a product consultancy focussed on helping young startups build great products.

- Scaled the backend of a coin-based audio/video calling app to serve 120,000+ active users across India and GCC by:
 - Reducing response times by 83% through database query optimizations and caching strategies.
 - Designing fault-tolerant wallet logic to ensure seamless user transactions.
 - Tech Stack: Django, DRF, PostgreSQL, Celery, Redis, Firebase, Agora, Nginx, Varnish, AWS.
- Designed and developed the backend for a healthcare platform, enabling real-time communication between clinics, doctors, chemists, and patients with robust:
 - Database design for scalability and performance.
 - Fault-tolerant booking systems leveraging Test-Driven Development (TDD) with 100% coverage.
 - Tech Stack: Django, DRF, Channels, PostgreSQL, Celery, Redis, Agora, DocuSign, Stripe, AWS.
- Refactored and optimized a legacy ERP system for a construction enterprise, enhancing code maintainability and performance with:
 - Comprehensive database restructuring and rigorous code quality improvements.
 - Tech Stack: Django, DRF, PostgreSQL, MySQL, face-recognition, Redis, Linux, AWS.
- Led backend engineering efforts:
 - Conducted developer estimates, technical interviews, and mentorship programs.
 - Improved team productivity through code reviews and enforcing coding standards.

Full Stack Developer

Kengram Edtech, Pvt. Ltd. - Kerala, IN (full-time, hybrid)

Kengram Edtech is a company offering edtech products and services.

- Built and scaled in-house edtech products to improve student and educator experiences:
 - Developed a secure Learning Management System (LMS) using the MERN stack and integrated Amazon S3 and CloudFront CDN, improving educator workflows and content delivery.
 - Created a Progressive Web App (PWA) with React.js and FastAPI, enhancing student engagement through learning progress analytics.
 - Tech Stack: React.js, Redux, FastAPI, PostgreSQL, MySQL, Celery, AWS
- Built and optimized a lead generation engine using Django and OpenAI GPT-3.5, automating workflows and increasing lead conversion rates.
- Maintained and optimized IT infrastructure and cloud deployments, ensuring high availability and scalability for both in-house and client-facing applications.
- Mentored and collaborated with cross-functional teams, enforcing best practices in development, clean coding, and scalable architecture.

2018 - 2023

Web Development Consultant

Freelance - Jeddah, KSA (freelance, on-site)

Collaboration with agencies and developers in the GCC region.

- Delivered 50+ WordPress websites for clients in the GCC region, including:
 - E-commerce solutions with WooCommerce, enhancing sales and user experience.
 - Learning platforms with LearnDash LMS, enabling course delivery, tracking, and certifications.
- Increased organic traffic by 40% through SEO-optimized website development and compelling blog content.
- Trained clients for post-launch website management, reducing support requests by 50% and ensuring operational independence.

2013 - 2018

EDUCATION

2021 - ongoing	2022 - 2023	2010 - 2014
IIT - Madras	HarvardX, Harvard University	MESCE, Calicut University
BS in Data Science & Applications	Professional Certificate in Web Programming	BTech in Electronics & Communications Engineering

INTERESTS & HOBBIES

- Big History, Cosmology, AI, Learning Sciences, Self-Development
